nunki.usc.edu(1): cd ee450/socket_project
nunki.usc.edu(2): ./serverD

The Server A has UDP port number 24646 and IP address 68.181.201.3.

The Server D has the following neighbor information:
Neighbor-----Cost
serverB 15

The Server D finishes sending its neighbor information to the Client with TCP port number 25646 and IP address 68.181.201.3.

For this connection with the Client, the Server D has TCP port number 55288 and IP address 68.181.201.3.

The server D has received the network topology from the Client with UDP port number 52929 and IP address 68.181.201.3 as follows:
Edge-----Cost
AB 20
AC 10
BC 30
BD 15

For this connection with Client, the Server D has UDP port number 24646 and IP address 68.181.201.3.
